Disclosure of Policy on Determining Remuneration Amounts and Calculation Methods

The Company's basic policy and determination process regarding executive remuneration system is as described below.

In order to ensure the objectivity and transparency of the Executive Remuneration System, the Company has at its discretion established a Remuneration and Nomination Committee comprising the Representative Director and outside directors. • Basic Policy on the Executive Remuneration System

1. Directors (excluding Directors who are Audit & Supervisory Committee Members):

-Remuneration for Executive Directors shall comprise fixed remuneration (monetary), performance-linked remuneration (monetary), and restricted stock remuneration. The ratio shall be approximately 10:9 (base remuneration amount, which varies depending on performance):10.

-Remuneration for Non-Executive Directors shall comprise fixed remuneration (monetary) and restricted stock remuneration. The ratio should be approximately 4:1.

-Fixed remuneration (monetary) shall be determined based upon role, remuneration in past years, the company performance to date, the need to retain talented human resources, research by specialized third-party organizations, remuneration trends at comparable companies, and economic conditions. Fixed remuneration (monetary) shall be paid monthly.

-In order to strive for growth that strikes a balance between scale and profitability, the amount of performance-linked remuneration (monetary) is calculated using consolidated net sales and consolidated operating income as metrics. Specifically, the amount of performance-linked remuneration is obtained by multiplying the basic remuneration amount (¥90 million) by a multiple (no greater than 400% and no less than 0%) that is pre-determined according to the degree of deviation from the base amount determined by the Remuneration and Nomination Committee. Performance-linked remuneration (monetary) shall be paid once a year after the business results for each fiscal year are determined.

- The Company offers restricted stock remuneration in order to provide a long-term incentive for directors (excluding directors who are Audit & Supervisory Committee members) to work to achieve sustained growth and to enhance corporate value, as well as to encourage them to have an even greater sense of shared value with shareholders. Such a program is offered because it provides a sustained incentive to bolster the share price when it is down and because it serves as a replacement for the discontinued retirement allowance for directors. The Remuneration & Nomination Committee determines the remuneration value of the restricted stock, taking into account the balance with the monetary remuneration. The restricted stock is granted once annually during the second quarter.

2. Directors who are Audit & Supervisory Committee Members:

-In consideration of independence from management, only monetary remuneration shall be made.

-Fixed remuneration (monetary) shall be determined based upon role, remuneration in past years, the need to retain talented human resources, research by specialized third-party organizations, remuneration trends at comparable companies, and economic conditions. Fixed remuneration (monetary) shall be paid monthly.

• Director Remuneration Determination Process

1. Individual amounts and the nature of remuneration for Directors (excluding Directors who are Audit & Supervisory Committee Members) shall be determined by the Remuneration and Nomination Committee based on the Basic Policy on the Executive Remuneration System established by the Board of Directors.

2. Individual amounts and the nature of remuneration for Directors who are Audit & Supervisory Committee Members shall be determined via discussions by the Directors who are Audit & Supervisory Committee Members, with reference made to the basic policy determined by the Board of Directors.

3. Individual amounts and the nature of remuneration shall be set within the confines of the remuneration allocation approved at the General Shareholders' Meeting and shall be determined based upon a comprehensive consideration of annual earnings and each director's performance in his/her role and contribution to corporate earnings, remuneration in past years, the need to retain talented human resources, research by specialized third-party organizations, remuneration trends at comparable companies, and economic conditions.

2. Other Matters Concerning the Corporate Governance System

The status of the Company's current internal system concerning timely disclosures is described below.

- The Company's guideline is to disclose information in a timely and appropriate fashion in order to deliver useful information to its investors. Specifically, the Company discloses in a timely fashion information with significant impact on investment decisions in accordance with the Timely Disclosure Rules set forth under the Financial Instruments and Exchange Act and by the Tokyo Stock Exchange, and proactively discloses other information determined to be useful for understanding the Company.

- In order to obtain understanding regarding the Group's earnings and future potential, the Company is proactive in disclosing information in a timely and appropriate fashion via direct communications by the President. Specifically, the President serves as a speaker in order to proactively disseminate information at the financial results briefing sessions held immediately after quarterly earnings announcements, domestic and overseas IR road shows, and at the IR conferences that serve as a forum for direct dialogue with individual investors.

- The primary departments involved in timely disclosure are the Accounting and Finance Division, which engages in duties associated with financial results, budget control, capital management, etc., the Legal Division, which engages in duties associated with organizing key meetings, managing rules, and equity procedures; and the Corporate Strategy Division, which engages in duties associated with drafting corporate plans, budgeting, organizing key meetings, managing affiliate companies, IR, etc. The generation and publication of disclosure documentation is subject to audits by the Internal Audit Department, which provides regular assessments of their legal compliance and appropriateness.

- The Accounting and Finance Division is responsible for generating and submitting securities filings and calculation documents set forth by the Companies Act, while the Corporate Strategy Division is responsible for generating and submitting disclosure documentation to the Tokyo Stock Exchange. The aforementioned responsible departments collect drafts that have been drawn up and checked by the relevant teams, organize them into disclosure documentation, and submit them. Once the documentation drafts have been generated and repeatedly checked by the relevant teams, they are submitted to the Board of Directors for approval. After financial result figures have been approved by the Board of Directors, they are immediately disclosed in a timely fashion on the order of the head of the Accounting and Finance Division, who is responsible for the handling of information.
- The Corporate Strategy Division conducts the timely disclosure of decisions and incidents in cooperation with the accounting and financial department. Decisions are those that have been passed or approved by the designated decision-making body or approver in accordance with the approval authorities prescribed by the Delegation of Authority Rules. The head of the Corporate Strategy Division engages in discussions with the head of the Accounting and Finance Division, who is responsible for handling information, regarding decisions that have passed through the aforementioned processes to consider whether, based on the Timely Disclosure Rules set forth by the Tokyo Stock Exchange, said decisions need to be subject to timely disclosure and if so, by what means. If the decisions require timely disclosure, the head of the Corporate Strategy Division will order the relevant teams to generate disclosure documentation. The disclosure documentation generated will be finalized after having been subject to multiple reviews, and only then be subject to timely disclosure on the order of the head of the Corporate Strategy Division. Furthermore, in the event that a significant incident should be identified in an internal department, the head of the department that has identified said incident shall immediately report the same to the President and the head of the Corporate Strategy Division. The head of the Corporate Strategy Division shall, after engaging in discussion with the President and the head of the Accounting and Finance Division, who is responsible for handling information, consider whether, based on the Timely Disclosure Rules set forth by the Tokyo Stock Exchange, said decisions are subject to timely disclosure and if so, by what means. Going forward, rapid expansion in the scale and scope of the Company's businesses is likely to result in a greater diversity of decisions and incidents. As such, the Company will work to revisit its decision-making processes and system of checks on an ongoing basis in order to maintain appropriate timely disclosures.
