2. Reasons for the Dividend Amount

The Group recognizes the return of profits to shareholders as one of its most important management tasks. The Group maintains internal reserves to place priority on investments that will enhance the value of the Group. Such investments will be made in order to increase the Group's value through expansion of existing businesses, new business development, and reform of the business structure. With retaining an appropriate amount of internal reserves, the Group attaches continued importance to the shareholder returns, primarily by means of cash dividend, in an optimal balance between the performance-based payout and the stable returns. The amount of dividends is determined upon the comprehensive consideration of the balance of the investments and the return of profits to shareholders, using consolidated payout ratio of approximately 30% as a guide.

Based on the results of the fiscal year ended March 31, 2017, the Company's Board of Directors' Meeting passed a resolution to pay the year-end dividends for the fiscal year ended March 31, 2017 of 40 yen per share (together with the interim dividends of 10 yen per share paid in last December, the amount of annual dividends will be 50 yen per share).
